CSCE4123 Assignment 7

Assignment tasks:

1. Task problem https://www.spoj.com/problems/ACODE/
   Hint: For each digit in the string, it may be combined with the next digit or as a standalone character.
   There are several special cases in the discussion, try to use them to test your code.

2. Task problem https://www.spoj.com/problems/GRACON/
   Basically a graph connectivity detection problem

3. Task problem https://www.spoj.com/problems/DISQUERY/
   Shortest/Longest path problem. Note the tight time constraint. You will need to optimize your code.
